December 21, 2005

Dear Sirs:

Fusionworks has been our partner in critical projects for the past 5 years. They have helped us deploy and upgrade our Oracle based financial systems in Puerto Rico and Dominican Republic. Fusionworks has provided development, project management, and training during our deployments and ongoing support as needed. They have always delivered quality work, as scheduled, and on budget.

You'll be hard pressed to find another company as proficient with Oracle products as this outfit. Fusionworks has accumulated a highly competent group of professionals that keeps an honest and transparent business relationship with our organization at all levels. This is the first recommendation letter I write in my 20 years as an information technology professional for a local company and no other more deserving than Fusionworks. If you need further information, please feel free to contact me as required.

Cordially,

A handwritten signature in blue ink, appearing to read "Juan J. Díaz".

Juan J. Díaz
